<p>(54) Title: PREVENTION OF FETAL ALCOHOL SYNDROME AND NEURONAL CELL DEATH WITH ADNF POLYPEPTIDES</p>		
<p>(57) Abstract</p> <p>The invention relates to methods for reducing a condition associated with fetal alcohol syndrome in a subject who is exposed to alcohol <i>in utero</i> with an ADNF polypeptide (e.g. ADNF I polypeptides, ADNF III polypeptides, or mixtures of ADNF I and ADNF III polypeptides). In one embodiment, the present invention relates to methods for reducing a condition associated with fetal alcohol syndrome in a subject who is exposed to alcohol <i>in utero</i> with a mixture of ADNF I and ADNF III polypeptides. The present invention further relates to methods for reducing neuronal cell death by contacting neuronal cells with a mixture of ADNF I and ADNF III polypeptides. Still further, the present invention relates to a pharmaceutical composition comprising a mixture of ADNF I and ADNF III polypeptides.</p>
